<b>Layout Era</b>	1950s/60s	<b>Traction</b>	Steam, Diesel & EMU
<b>Barriers Required</b>	No	<b>Current Status</b>	Running, Available for Exhibitions
<b>Program Information</b>			
Fenley on Sea is a small terminus station based somewhere on the Essex coast in the late 1950s / early 1960s just before the Beeching Era. Modernisation has come to Fenley on Sea in the form of Electrification of the Clacton, Walton and Fenley routes.			
A good mixture of Steam, Diesel and Early class 308 and 309 EMUs can be seen on the line which depicts a busy seaside terminus with a branch line to Ipswich which is operated by DMUs which is in it's final years.
